IILM UNIVERSITY

IILM UNIVERSITY, GREATER NOIDA

SCHOOL OF COMPUTER SCIENCE & ENGINEERING

WEEKLY PROGRESS REPORT

Even semester 2026-2027

B.Tech. Major Project Details

Project Id	26P_3CSE339
Project Title	Machine Learning Based Smart Crop Recommendation System.
Reporting period	25/08/2026 – 31/08/2026
Week No.	Week-1

Work Completed This Week: Submission of Major Project Report (Phase-I)

Challenges/Issues: Understanding the project requirements and finalizing the Machine learning approach.

Plan for Next Week: Dataset Collection & Preprocessing

Guide's Remarks: student is advised to complete dataset preprocessing and model training.

WEEKLY PROGRESS REPORT

Even semester 2026-2027

B.Tech. Major Project Details

Project Id	26P_3CSE339
Project Title	Machine Learning Based Smart Crop Recomoendation System
Reporting period	07/09/26 — 11/09/26
Week No.	Week - 2

Work Completed This Week:
- Collected and examined the Crop Recomendation System.
- Checked the dataset structure, Columns and missing values.

Challenges/Issues: Understanding the dataset features, selecting a suitable machine learning algorithm, and evaluating the model's prediction Perfomance.

Plan for Next Week: Develop the Streamlit web application and integrate the trained machine learning model with the user interface.

Guide's Remarks:

Good progress in project development.

WEEKLY PROGRESS REPORT

Even semester 2026-2027

B.Tech. Major Project Details

Project Id	26P_3CSE339
Project Title	Machine Learning Based Smart Crop Recommendation System.
Reporting period	15/10/26 – 21/10/26
Week No.	Week-3

Work Completed This Week:

- Developed the web application using Streamlit and Python.
- Integrated the saved Random Forest model
- Created input field for N, P, K, PH etc.

Challenges/Issues:

Maintaining consistent input feature names and order, handling Prediction results during Streamlit reruns and improving the interface and user experience.

Plan for Next Week:

Test the application with different input values, resolve Prediction refresh issues, and Prepare the Project file.

Guide's Remarks:

student is advised to resolve the remaining issue.

WEEKLY PROGRESS REPORT

Even semester 2026-2027

B.Tech. Major Project Details

Project Id	2GP_3CSE339
Project Title	Machine Learning Based Smart Crop Recommendation System.
Reporting period	22/10/26 – 26/10/26
Week No.	Week - 4

Work Completed This Week:

- Tested the application with Sample Soil and Weather input values. and verified the model loading and Crop Prediction workflow.
- Improved the web-interface and Presentation of Crop Recommendation.

Challenges/Issues:

The Prediction result was not refreshing as expected after changing input values. further debugging and validation were required. Deployment and online functionality also needed verification.

Plan for Next Week:

Resolve the Prediction refresh issue. Complete deployment on Streamlit Community Cloud, test the online application and document the results and remaining limitations

Guide's Remarks:

Good progress in project development. continue testing and validation.
